

Nitro D

23 HP Diesel Hydraulic Power Pack

The NITRO D is a hydraulic power pack with a 23 HP Kubota diesel engine designed to power tools and hydraulic equipment with a high flow or pressure requirement. The NITRO D has two parallel circuits to drive two different hydraulic tools.

One circuit provides 5 gal/min and the second one 7.5 gal/min. The circuits can be combined to provide 12.5 gal/min for large tools. The large 13 gal oil tank and the double radiator cooling system insure proper hydraulic function even in the most demanding applications.

Nitro D

Hydraulic Power Pack

The chassis can be "skid" type (as shown) or with equipped with wheels and handles.

The Nitro D is able to drive heavy duty hydraulic equipment like multiple portable tools or large water pumps. It is an excellent choice for demanding environments like driving underwater hydraulic tools or for applications in industrial environments.

Specifications

Weight	488 lbs
Dimensions (inches)	37½ x 23¾ x 25½ High
Flow	5 gal/min + 7.5 gal/min
Hydraulic Pressure	2000 psi
Fuel	Diesel (8 gal tank)
