

SP21

2" Submersible Hydraulic Trash Pump - ATEX VERSION

SP21 is a compact and powerful submersible trash pump with cast iron hydraulic motor. The pump is ATEX approved and has been designed to pump in explosive environments of:

- flammable liquids
- water in the presence of explosive vapors
- slurries and liquids with high viscosity

Flow is up to 200 GPM, at a head of 110 feet with the capacity of pumping suspended solids of one inch diameter.

ADVANTAGES

- Unbeatable power to size/weight ratio
- Ability to run dry without damage
- Durability due to robust construction and minimal maintenance needs
- Versatility thanks to the possibility to be powered by small power packs, mining machinery, excavators, jeeps, trucks and rescue vehicles
- ATEX configuration with cast iron motor
- Integrated valve in the hydraulic motor prevents excess pump speed
